

Hospital Management System

Team members:

1. P. Sriram
2. Harsha
3. Naga Akash
4. K. Nitish

1.0. Functional Requirements:

Actor/User	Requirements
Administrator	To create, update and deactivate user accounts for all roles
	To assign roles and access permissions to users
	To onboard doctors, map their specialization and assign them to departments
	To add and manage departments, wards and beds
	To view consolidated dashboards for occupancy, revenue and patient flow
Receptionist	To register new patients and generate a unique patient ID
	To search and update patient profiles
	To check doctor availability and book, reschedule or cancel appointments
	To admit, discharge and transfer patients (ADT)
	To allot and release beds and view ward occupancy
	To generate bills from consultation, lab and pharmacy charges
	To generate invoices and record payments and payment status
Doctor	To view assigned patients and the daily appointment schedule
	To manage own duty schedule and availability
	To view and update patient medical history and records
	To write prescriptions
	To order laboratory tests for a patient
	To view lab reports of a patient
	To recommend admission, transfer or discharge of a patient
Pharmacist	To add and update medicine stock

Actor/User	Requirements
	To receive low-stock and reorder-level alerts
	To view prescriptions issued by doctors
	To dispense medicines and record issuance against prescriptions
	To send pharmacy charges to billing
Lab Technician	To view test orders raised by doctors
	To record sample collection and track sample status
	To upload test reports against the patient and doctor request
	To send diagnostic test charges to billing
Patient	To log in to the portal
	To view and update own profile
	To book, reschedule or cancel own appointments
	To view own medical history and prescriptions
	To view lab reports
	To view own invoices and payment status
